

## Assembly Instructions for Two Piece Flagpoles

### Steps:

1. Assembling the two-piece fiberglass flagpole is extremely simple.
2. Slide the upper portion of the flagpole over the sleeve protruding from the bottom section of the flagpole.
3. Align the mold mark on both sections of the flagpole. The mold mark is formed in the manufacturing process. Push the bottom and top sections together.
4. A rubber mallet may be used to move the sections together the last couple inches. Hit the top of the flagpole with the mallet until the two sections are touching and the inner sleeve is no longer visible.

Congratulations: You will now enjoy the beauty of your new flag and flagpole!!!
